by providing
same day city wide delivery,
drive-thru access,
nebulizer medications,
diabetic specialty services,
and much more!

Above services available
at most locations.

\$10 G\$P membership fee per household.

FREQUENTLY ASKED QUESTIONS

Why should I enroll in this program?

If you are uninsured or your insurance doesn't cover all of your medications, Medicine Chest's Generic Savings Plan offers discounted prescription pricing for you and members of your family as well as over the counter products.

ELIGIBILITY, COVERAGE AND MEMBERSHIP INFORMATION

Who's included/excluded in a family membership?

For just \$10 a year a family membership includes a single account that covers everyone in your immediate family, including a spouse, dependents under the age of 23.

Why are Medicare, Medicaid and TRICARE recipients excluded?

Federal and state statutes prohibit persons enrolled in a publicly funded health care program to participate in this program.

Is the Generic Savings Plan a substitute for prescription insurance?

This program is not an insurance plan. However, if you do not have insurance, have prescriptions that may be excluded by your insurance plan or not covered because you have exceeded your insurance plan's maximum, this program can save you and your family significant money on your prescription needs.

If I already have insurance but want my uncovered drugs to be filled under the Generic Savings Plan, would the club be considered secondary insurance?

The Generic Savings Plan cannot be used in conjunction with other prescription drug insurance or discount cards on any one purchase. If the Generic Savings Plan has a lower price on your medication than your insurance, you can use the club in place of your insurance. Of course you can always use the program to purchase prescriptions that are not covered by your insurance. Having other prescription drug coverage does not disqualify you from enrolling in the Generic Savings Plan unless it is a publicly funded health care program.

Generic \$avings Plan

Hundreds
of Leading
Generic
Medications
